

NESTOR & ROTSSEN

BELGIAN CRAFTSMANSHIP

NESTOR & ROTSEN

Artisanal Belgian design

Organic materials, pure lines with artisanal materials.

Nestor & Røtsen creates inspiring luxury objects that mirror the beauty of nature's imperfection by continuously developing new materials in a traditional way. These are handmade and have been through a natural or mechanical baking process.

We work with ceramics, glass, minerals, fossils & stone, metal, lime...

By combining the firing process with glazes, patins and oxidants, unique materials, textures and rainbow-like colours are created. They give strength to geometrically imperfect patterns, and organically sculpted objects and functional installations.

KYMA – BATHTUB

The functional sculpture

KYMA is a new series of hand sculpted bathtubs, based on an in-house developed, flexibly applicable material with endless possibilities in terms of variation and personalization. It's this high level of customization that elevates each one-of-a-kind piece from being functional to being a functional sculpture.

KYMA – BATHTUB

Inspired by the seamlessly made Franklin Tables from the N&R collection, 'Kyma' was born. With its outspoken artistic design, Nestor & Rotsen immediately shows the possibilities with it. Elegant, playful feminine forms flow naturally into more clean, masculine lines'. The association with undulating water is obvious and the texture is also reminiscent of elements from nature.

In the bath sculptures, feminine, sophisticated and minimalist faucets were designed to match the bath concept and dialogue with the pedestal on which the bathtub rests.

Material
Tup: Neststone, mineral plaster
Base: Bronze

Sizes in cm:
L. 240 x B. 120 x H. 75
Custom design and dimensions available on request

Colors:
18 base colours,
Custom colours available on request

KYMA - CLASSICS

The KYMA series includes classic sizes, as well as the more personalized sculptures in which two to four people can comfortably enjoy the relaxing effect of water and harmoniously designed aesthetics.

The organically shaped tubs come in earthy hues, chosen from a subtle palette in which natural pigments and color variations predominate. Warm brass faucets match the overall concept and dialogue with the base on which the bathtub is positioned.

KYMA - EXTRAVAGANT

For the most exclusive projects Studio N&R has developed an inimitable construction system. This enables us to combine the most extravagant personalized designs, colours & textures. Give us the interior context and dimensions and we will create the most exclusive bath for you.
